

How to get started with Flutter

1. Download Flutter:

[Install Flutter manually](#)

link: <https://docs.flutter.dev/install/manual>

2. Unzip the folder and move it to the C drive.

3. Add C:\flutter\bin to the PATH

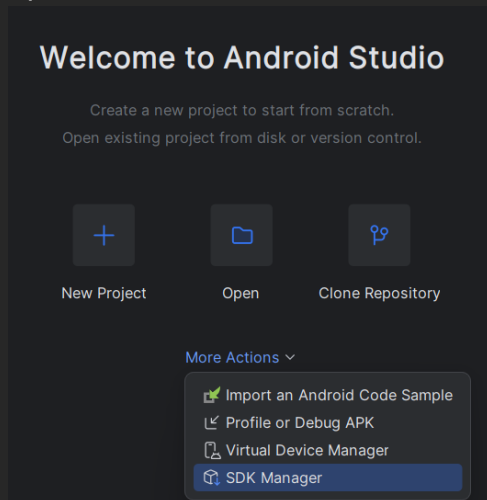

4. Run flutter doctor in the terminal

5. Install Android Studio

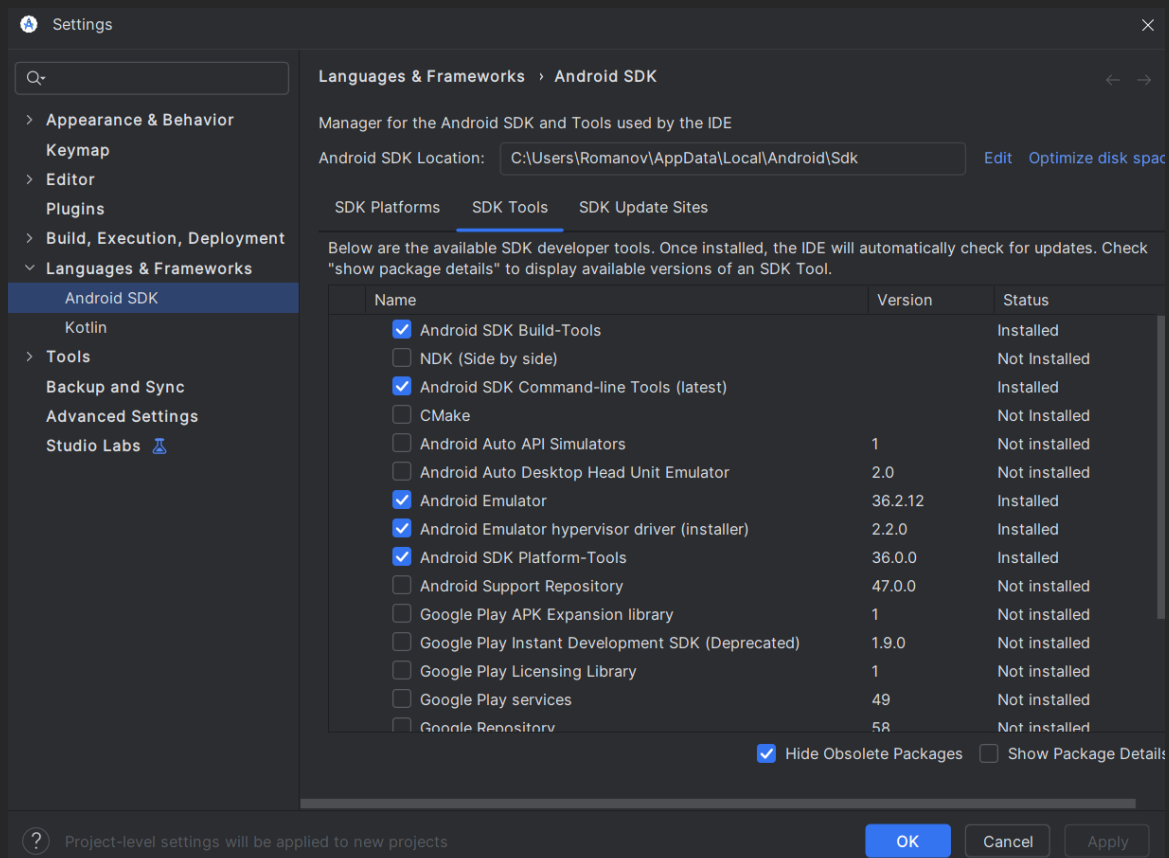

[Download Android Studio & App Tools - Android Developers](#)

link: <https://developer.android.com/studio>

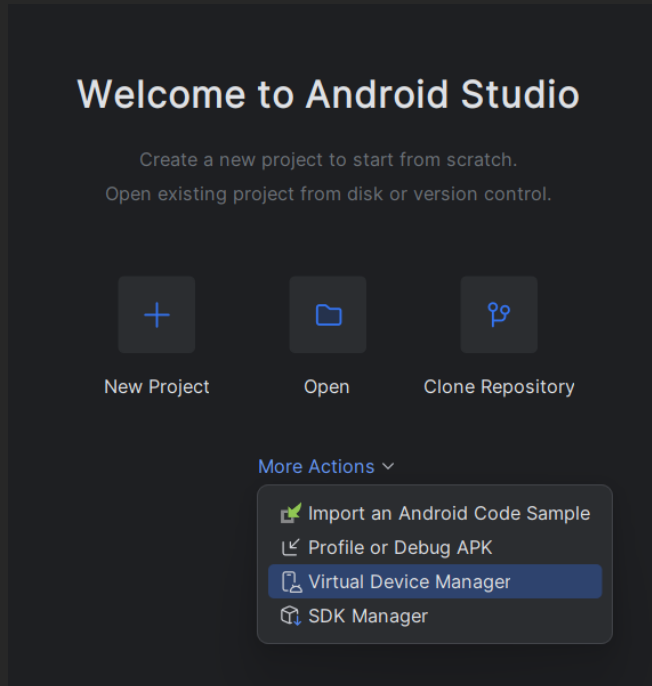

6. Open Android Studio and chose SDK Manager

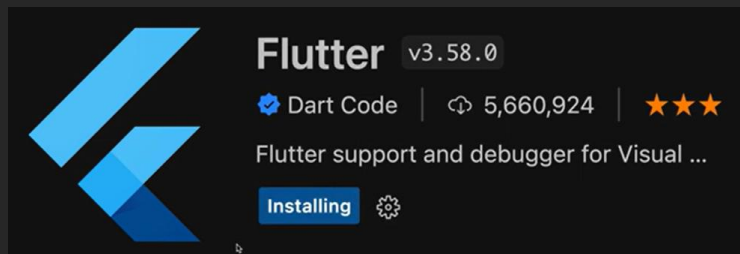

7. Make sure the Android SDK Command line tools are installed

8. Make sure you have a virtual device

9. Install the Flutter extension for VS Code

10. To create a new project, run `flutter create project_name`
